

Replacing the Antenna

Warning: always disconnect any electrical appliance before attempting any repairs.

Tools required: one small Phillip screwdriver

Step 1. Remove the screw from the side of the antenna holder.

NOTE: When you remove the antenna be care full not to loose the small washer positioned on each side of the antenna.

Step 2. Place the new antenna into the holder along with the two small washers. Re-insert the screw into the side of the antenna holder.

Step 3. Re-connect the power supply to the umbrella and turn on the radio to test the antenna.
