

POWER BASE

ASSEMBLY INSTRUCTIONS

STEP 1.

Place the power base onto a level area. Remove the base lid, and load sand and/or pebble into the honeycomb pockets of the base. (See dia. 1)

STEP 4.

Attach the support tube to the rotating base with four Hex head bolts. Remove the thumbscrew and slide the base cover over the support tube. (See dia. 2)

STEP 5.

Place the umbrella onto the support base, then re-attach and tighten the thumbscrew.

NOTE: The base should sit flat on the surface to prevent it from moving during windy conditions.

STEP 6.

To move the umbrella to another location, simply, adjust the four wheels. (See dia. 3) **NOTE:** it is not necessary to empty the base in order to adjust the wheels.

STEP 7.

You can rotate your umbrella 360 degree by simply stepping on the base foot pedal and rotating the umbrella manually. When the umbrella is at your desired location, release the foot pedal and the umbrella will automatically lock into place.
